

Frame rate is a voice

The morning

Time	Class	Screen
10:00 to 10:12	Frame rate is a voice	classroom.html#slide-1
10:12 to 10:48	Second look: who moves on twos	media.html#spider-open
10:48 to 11:06	Animation analysis, three stations	notes.html#stations
11:06 to 11:16	Ten-minute break	classroom.html#slide-6
11:16 to 11:46	Kaiju No. 8: expressive motion without the money	media.html#kaiju
11:46 to 12:06	Synthesis: how animation choice makes character	notes.html#synthesis
12:06 to 12:45	Mood board team time, the real one	team-studio.html
12:45 to 12:50	Exit ticket, two lines	notes.html#exit

What you will practice

1. Read a change of drawing rate as a statement about character before any dialogue confirms it.
2. Name three comic-book devices in motion and say what each buys.
3. Take one portable lesson from a show that got expressive motion without a Spider-Verse budget, and bring it to the mood board.

The clips

- Spider-Man: Into the Spider-Verse, the first nine minutes, 0:00 to 9:00. When the drawing rate changes, who changed, and what did it tell you before anyone spoke?
- Spider-Man: Into the Spider-Verse, official trailer, 0:00 to 2:40. Which three visual devices would let you name this film from a single frame?
- Kaiju No. 8, official trailer, 0:00 to 1:39. Where does the drawing rate change, and what is it buying each time?

Stations, 10:48

A 0:00 to 3:00 · B 3:00 to 6:00 · C 6:00 to 9:00 of the opening. Record one rate change and what it says, one comic device and what it buys, one cheaper choice and its cost.

Concepts

On ones, on twos. Animating on ones draws a new image for every frame, 24 per second. On twos, each drawing is held for two frames, 12 per second.

Smear frame. A deliberately distorted in-between drawing that carries fast motion across a cut instead of a camera-style motion blur.

Calling card. A distinctive visual element, move or style that identifies a creator or character.

Chimera. An image or form composed of multiple disparate elements; a hybrid or composite visual approach.

2D over 3D, seam visible. Hand-drawn characters composited over computer-animated destruction, with the difference left legible rather than hidden.

Team time, 12:06 to 12:45

Say your palette out loud. Show the one image you cannot justify. Name what is missing.

Dates

Mood-board file: Thursday October 1, 5 PM Pacific. Presentations: Monday October 5, five minutes, everyone speaks. Homework, ungraded: two lines on a frame-rate change in an animation you choose, for Wednesday.
