

Three worlds that exist twice

The Last of Us. League of Legends and Arcane. Minecraft. What does the crossing cost, and what does it buy?

10:00 • Content: fantasy violence in two trailers, brief crime imagery and profanity in one.

Same company, same world

Awaken, then Arcane. What did Arcane gain by giving up photoreal rendering? What did it give up? Which would you rather have made?

10:12 • Two clips, then talk

The three questions

One: what survived unchanged. Two: what had to be reinvented. Three: what is simply gone, and is its absence felt?

10:48 • One pair per team, in writing

Question three, one team at a time

What is gone, and does the work ache without it?

11:00 • Say it in one sentence

Ten-minute break

Back at 11:16.

11:06

Minecraft: the game, then the film

Whose hands are building? Whose choice is
every block?

11:16 • Two trailers back to back

Crossing, or contradiction?

A world whose whole identity is that you built it, adapted into a form where you watch somebody else build. Nobody is going to settle this for you.

11:26 • Many of you will build in Minecraft. This is about your work.

Cinema inside the engine

Clair Obscur, then GTA VI. Lighting, camera and composition authored in the engine.

11:46 • Content: fantasy violence; brief crime imagery and profanity

The engine board

Easy for engines, expensive for cameras. Still hard for both. The shot that proves each.

11:54 • Homework: three sentences on what only an engine lets your project do

Last hands on the board

Count out loud. Say the palette, then check the screen. The room names the weakest image. Cut it.

12:15 to 12:45 • File due tomorrow, 5 PM

Two lines before you leave

One term you learned today and where you saw it. One thing you are still unsure of.

12:45
