

Frame rate is a voice

Today, block by block

10:00 to 10:12 **Watch cold: Spider-Verse, the first nine minutes**

Just watch. No notes. Notice who moves differently.

10:12 to 10:41 **Second look: ones and twos, comic devices, smears**

Quick callback on ones and twos, then two lenses on the same nine minutes, then the trailer.

10:41 to 11:05 **Kaiju No. 8, episode 1, the whole episode**

Notice every switch between drawn people and the 3D monster.

11:05 to 11:15 **Break**

Ten minutes. Leave the room.

11:15 to 11:46 **Anime lab: when the style changes**

Kaiju talk, then To Be Hero X, episode 1 in 3D and episode 8 in 2D.

11:46 to 12:06 Synthesis

One sentence: how does an animation choice create character? Bring evidence.

12:06 to 12:45 Mood-board team time

Work in your real shared board. File due Thursday, 5 PM.

12:45 to 12:50 Exit ticket

Two lines: one term and where you saw it, one thing you are unsure of.

What you will practice

1. Read a change of drawing rate as a statement about character before any dialogue confirms it.
2. Name three comic-book devices in motion and say what each buys.
3. Take one portable lesson from a show that got expressive motion without a Spider-Verse budget, and bring it to the mood board.

The clips

- Spider-Man: Into the Spider-Verse, the first nine minutes, 0:00 to 9:00. When the drawing rate changes, who changed, and what did it tell you before anyone spoke?
- Spider-Man: Into the Spider-Verse, the forest swing (Another, Another Dimension), 0:00 to 2:09. How often does the drawing change under Miles, and under the older Spider-Man beside him?
- Spider-Man: Into the Spider-Verse, official trailer, 0:00 to 2:40. Which three visual devices would let you name this film from a single frame?
- Kaiju No. 8, episode 1: The Man Who Became a Kaiju, 0:00 to 23:40. Every time the picture switches between drawn people and the 3D monster, notice it. What does each side buy?

- To Be Hero X, episode 1 (3D) and episode 8 (2D), 0:00 to 8:00. Same world, two looks. What does a change of style tell you about a character?

Kaiju No. 8, 10:41

The whole of episode 1, 23:40, on the classroom screen. Notice every switch between drawn people and the 3D monster.

Anime lab, 11:15

Kaiju talk. Then To Be Hero X, episode 1 in 3D and episode 8 in 2D: what does a change of style say about a character, and could a character in your game own a style?

Concepts

On ones, on twos. Animating on ones draws a new image for every frame, 24 per second. On twos, each drawing is held for two frames, 12 per second.

Smear frame. A deliberately distorted in-between drawing that carries fast motion across a cut instead of a camera-style motion blur.

Calling card. A distinctive visual element, move or style that identifies a creator or character.

Chimera. An image or form composed of multiple disparate elements; a hybrid or composite visual approach.

2D over 3D, seam visible. Hand-drawn characters composited over computer-animated destruction, with the difference left legible rather than hidden.

Team time, 12:06 to 12:45

Say your palette out loud. Show the one image you cannot justify. Name what is missing.

Dates

Mood-board file: Thursday October 1, 5 PM Pacific. Presentations: Monday October 5, five minutes, everyone speaks. Homework, ungraded: two lines on a frame-rate change in an animation you choose, for Wednesday.
