

The scene on paper

One critical moment. Eight to twelve panels. Someone else should be able to read what changes.

Team

Scene

We are testing whether an audience can see...

01 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

02 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

03 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

04 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

05 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

06 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

07 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

08 SHOT / BEAT

Action / change

Camera / shot scale / move

Seconds / light / color

Audience should notice

One check before the animatic

Do the holds total 30 seconds for your prototype test? Where does the viewer see that time has passed?

One thing a fresh viewer should notice
